

winter activities

weddings

games

public washrooms

community activities

places to hang out

safe bike riding

sports and games

shelters and outdoor dining

places to spread out

**What activities would you recommend for the green, open space?**

Due to its close proximity to residential uses consideration should be given to the impact of noise, privacy and lighting on residents.

Its size allows for different activities to take place at the same time such as picnics, games (frisbee, soccer), hanging out in the sun, etc.

This open green space, one of the largest in Whistler Village, is envisioned as a meadow in the summer and a snowy play space in the winter.

## the green

The Village Green and The Boulevard provide opportunities for passive and active uses, and for structured and unstructured events and activities.

natural play

gathering places

sports and games

a quiet place

sheltered outdoor places

outdoor gathering

natural play

**What uses would you recommend for these places within the open space?**

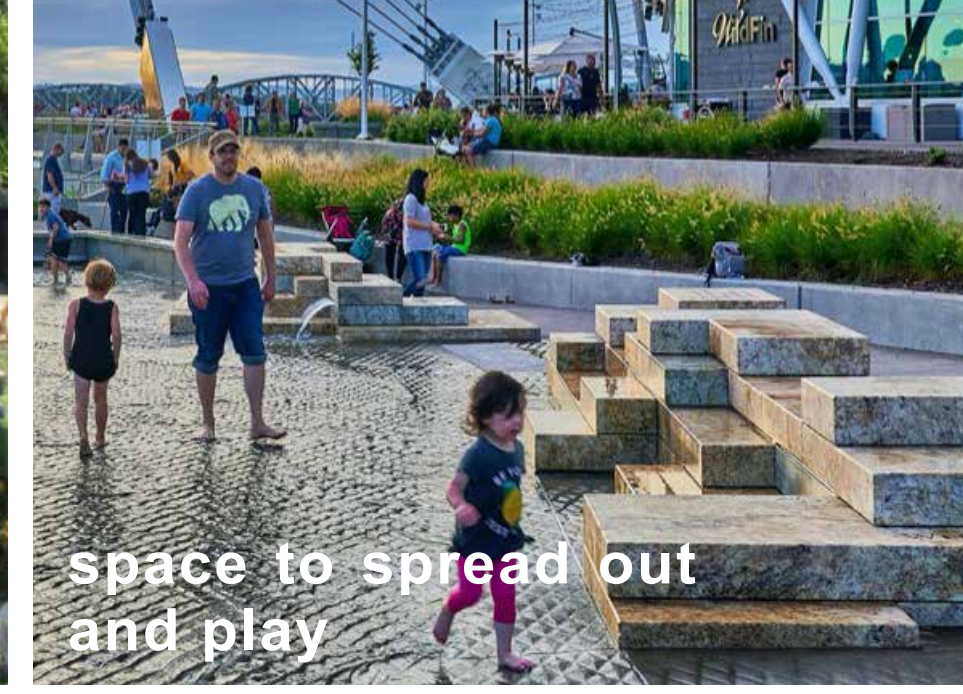

Larger spaces could accommodate play structures, larger group gatherings or programmed active uses including outdoor fitness or table tennis.

To complement the open green space, places for special uses can be integrated into the plan. These could be more intimate places for individuals or small groups to gather (picnic, socialize). They could be places for public art.

## discovered spaces

entertainment

space to spread out and play

landmark shelter

snow activities

gathering places

The community plaza is envisioned as an all weather / all season public space including an area protected by a landmark shelter.

It is large enough to accommodate community festivals, markets, events and performances and is supported by the commercial and community spaces in the community court.

These spaces are intended to be welcoming, multi-purpose outdoor places for casual use including generous areas of public seating and spaces for cafes and restaurants.

**How would you and your family use a community plaza? What community events or programming would you recommend?**

# public space and recreation

# Here are a few activities that are being considered:

- covered picnic shelters
- weddings
- yoga
- tai chi
- visiting artists
- “quiet” musicians
- activities that complement bigger uses in the Olympic Plaza
- play area
- back of house (delivery, drop off, electrical service, washrooms, storage etc.)
- theater/improv
- festivals
- food trucks / stalls
- artisans/artists
- First Nations art and culture
- wi-fi and tech facilities
- little kids bike route
- street musicians
- table tennis
